Subject: Scope of Work for Entrainment Monitoring Study

---

(See attached file: CSA\_proposal\_1.pdf)

Brian -

Thanks very much for arranging for yesterday's meeting. As we discussed, we are providing you with our selected contractor's technical proposal. This document was prepared in response to our request for proposals and will become the scope of work, subject to any modifications we need to make in schedule (our starting date for example has slipped from what we originally envisioned) or technical content, for a contract to implement the study.

I have substituted the contractor's detailed cost breakdown with a page giving the total estimated cost as currently envisioned. As I mentioned on that page, please contact me if any details of the cost estimate become an important issue in the approval process and we will provide you with the data you need.

I have discussed the questions about excluding some months from the sampling program, the approach for using SEAMAP data as a potential surrogate for future monitoring, and the need for a review of SEAMAP variability with Benny Gallaway, the lead fishery scientist for our study team. He is preparing a discussion of these items which we will forward to you as soon as it is ready.

Please contact me if you have any questions about this material.

Best regards,

Joe Smith
